SAFETY RIDER®
RUBBER SPEED HUMP
PRODUCT INFORMATION BROCHURE

PICTURED: SAFETY RIDER SPEED HUMP

Checkers™ is a full-service manufacturer of parking lot safety solutions. We design and manufacture traffic control products that help cars navigate and park safely. Our main goal has been to create solutions that protect motorists and pedestrians from the perils of today's parking lots. As such, Checkers™ products have been designed and developed with speed reduction, driver and pedestrian safety in mind. All our solutions are manufactured from 100% recycled rubber and plastic. Our speed bumps or parking blocks, for example, are longer lasting, highly visible, and more car-friendly than asphalt or concrete alternatives. Not only are Checkers™ traffic safety solutions environmentally friendly, they can also be installed for either temporary or permanent use.

- **Rubber speed humps greatly outlast asphalt competitors**
- **Rubber speed humps don't degrade, keeping parking lots and streets aesthetically pleasing**
- **Recycled rubber construction is environmentally friendly**
- **Pliable rubber protects vehicles while slowing them**
- **Highly reflective colored tape ensures the speed hump will be visible**
- **Easy-to-install, either on asphalt or concrete surfaces**
- **Can be used for temporary or permanent applications**
- **Great for commercial and residential applications**
- **Mounting hardware included with the purchase of a speed hump**
- **End caps are available and should be installed**

PRODUCT INFORMATION

Safety Rider® Speed Hump is a unique modular device designed to slow traffic to 10-15 mph (approximate) while maintaining a continuous traffic flow. Unlike asphalt or concrete, our speed humps are preformed to provide a uniform, consistent profile, and a smooth, safe ride. Constructed from 100% recycled tires, the interlocking tongue and groove system allows the sections to be linked together to cover the width of any roadway. The Safety Rider® is lightweight, simple to install, and does not require any road closures for installation. End caps are also available to provide a safe and protective finish to the ends of the hump. Ideal for slowing traffic in school parking lots, crossings, playground areas, hospitals, parking facilities, and anywhere slow traffic flow is required. The device can be easily removed for storage or relocation.

Material: Premium recycled rubber

- Interlocking design expands to any road width
- Tongue and groove system keeps product firmly in place
- High visibility with tape on mid-sections
- Easy installation on any paved surface
- Lightweight and perfect for permanent or temporary use
- Maintenance free
- Warranty: 3 years on the product; 1 year on the tape (under normal use)

⚠ WARNING: This product can expose you to chemicals including Arsenic, Cobalt, Cadmium, Lead, Chromium, Nickel Compounds, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

APPLICATIONS

- Traffic Control
- Parking Lots
