

# SP 100Mbps Series

## Small Form-Factor Pluggable Modules

The Allied Telesis 100Mbps SP Series offers the latest industry standard in flexible, full-duplex, Fast Ethernet connectivity. These hot-swappable interfaces simply plug into the SFP slot on all SFP-compatible products. Configuration can be optimized to meet a wide variety of distance and service requirements.

### Options

Allied Telesis SP 100Mbps Series Small Form-Factor Pluggables (SFPs) offers short-haul, long-haul, Bi-Directional (BiDi), and Copper solutions. This flexibility allows network managers to easily extend network distance and bandwidth.

Using an SFP BiDi transceiver can upgrade transmission capacity on a typical network—without installing new fibers—by utilizing a single fiber for both the send and receive signals.

### Compatibility

SP 100Mbps Series SFPs are Multi-Sourcing Agreement (MSA)-compliant, and fully adhere to industry standard networking regulations. This allows the SP 100Mbps Series to be used with other MSA-compliant platforms that support SFP uplink connections.

For Cisco compatibility please refer to the “SFP Compatibility Flyer”

### Standard Data Rates Supported

Fast Ethernet

### Environmental Specifications

Operating Temperature: 0°C to 70°C (32°F to 158°F)  
 Operating humidity: 0% to 85%, non-condensing  
 Storage Temperature: -40°C to 85°C (-40°F to 185°F)  
 Storage humidity: 0% to 80%, non-condensing
